SUMMARY

Actuarial Science graduate (Cum Laude, GPA 3.61/4.00) from IPB University, currently an actuarial intern at Asuransi ASEI Indonesia working on PSAK 117/IFRS 17 technical reserves, product profitability, and cash flow projections. Previous internships at LPS (standardized 800+ insurer financial statements, Python data validation) and Bank Rakyat Indonesia (survey analytics, Looker Studio dashboards). Seeking actuarial, risk management, insurance, data analyst, or financial analytics roles.

EDUCATION

IPB University

Bachelor of Actuarial Science *Aug 2022 - Jun 2026*

- GPA: 3.61/4.00 (Cum Laude)
- Related Coursework: Financial Mathematics, Probability Theory, Stochastic Processes, Predictive Model Analysis, Risk Theory, Derivative Financial Modeling, Software Engineering.
- PAI Professional Exams Passed: CF3 (Economics and Financial Markets), CF4 (Accounting and Financial Management)

WORK EXPERIENCE

Perusahaan Asuransi ASEI Indonesia

Intern - Actuarial Division *Aug 2026 - Present*

- Process and analyze statistical data for insurance product pricing and actuarial assessments.
- Support the calculation and review of technical reserves under PSAK 117/IFRS 17 and applicable actuarial standards.
- Prepare actuarial reports and analyses for internal management and regulatory reporting.
- Perform product profitability analysis and long-term cash flow projections.

Lembaga Penjamin Simpanan (LPS)

Intern - Insurance Data Management Group *May 2026 - Aug 2026*

- Collected and standardized 800+ financial statements from conventional and sharia insurers.
- Automated Python data validation, flagging inconsistencies, missing values, and anomalies.
- Built structured datasets and reporting files that made insurance data analysis more reliable.

PT Bank Rakyat Indonesia (Persero) Tbk - Culture Transformation Group

Intern - Activation Implementation Department *Oct 2025 - Apr 2026*

- Cleaned and consolidated employee survey datasets using Python, RStudio, and Excel.
- Analyzed employee engagement survey results and turned findings into actionable insights.
- Developed interactive Looker Studio dashboards to monitor KPIs and track performance.

LEADERSHIP EXPERIENCE

Vice President of Research
Komunitas Anak Aktuaria Indonesia (AAID) *Feb 2025 - Jun 2026*
- Designed and managed academic development programs for actuarial students nationwide.
- Supervised department members and kept the research work plan on schedule.

Director of Sport and Arts Management Department
Actuarial Sciences Students Association (ASSA) *Jan 2025 - Dec 2025*
- Led the planning and execution of sports and arts programs for actuarial students.

ACADEMIC PROJECTS

Reversionary Annuity Pricing under the CIR Model | Thesis *Nov 2025 - Jun 2026*
- Priced a multi-life reversionary annuity (two parents, two children) under CIR rates.
- Estimated CIR parameters by OLS and evaluated forecast accuracy with MAPE.
- Computed present values of premiums and benefits with TMI 2023 across benefit structures.

Monte Carlo Variance Reduction for Claim Severity | Project *Oct 2025 - Dec 2025*
- Compared antithetic, stratified, and importance sampling for claim severity simulation.
- Estimated VaR and TVaR over 10,000 simulations to compare efficiency and accuracy.

PCA and Machine Learning for Stock Prediction | Project *Apr 2025 - Jun 2025*
- Evaluated PCA's effect on Ridge, KNN, Random Forest, and XGBoost stock price models.
- Compared accuracy before and after PCA using AMD stock data (2014–2024).

Option Spread Strategies for Gold Futures Risk | Project *Apr 2025 - Jun 2025*
- Evaluated Butterfly and Broken Wing Condor spreads to limit gold futures downside risk.
- Priced options with Black-76 to compare strategy performance across market conditions.
